

**BELLE AIRE
PLACE CONDUCT
RULES
2024**

INTRODUCTION

Welcome to Belle Aire Place! For your ease of mind and information, we enclose a copy of the Conduct Rules and would appreciate it if you would familiarise yourself with them, and comply with these rules.

It is the aim of your Trustees to provide the carefree atmosphere that you envisaged when you either purchased or rented a unit. But in order to achieve this, these Conduct Rules are necessary, and after careful consideration and discussion with the Body Corporate, have been imposed on all Belle Aire Place residents.

These rules have been established to promote neighbourly relationships and to protect owners. Living in close proximity with your neighbours makes one more aware of their activities, and them of yours! This therefore requires more care and consideration of everyone, for everyone residing in the complex.

It is in the interest of all owners that the Conduct Rules are complied with, not only to the letter of the Rule, but in the spirit of townhouse living and in a way that will promote harmony among residents.

In the event of annoyance, irritation or complaints occurring between residents of units, an attempt shall first be made by the parties concerned to settle the matter between themselves. This should be done with consideration and tolerance. If, however, such problems cannot be solved amicably between the parties, the matter should be brought to the attention of the Trustees in writing. The Trustees may require that a complaint be submitted to them in the form of an affidavit before they can act on it.

Restrictions do have a positive connotation – the benefits and protection that you can obtain from their existence and enforcement.

29.1 Exclusive use of rooftop areas for installation of solar

Notwithstanding the fact that the Scheme's rooftop space is part of the common property as shown on the Scheme's sectional plan, in terms of sections 10(7) and (8) of the Sectional Titles Schemes Management Act of 2011 ('the STSM Act') exclusive use rooftop solar harvesting rights are hereby conferred on the owner of each residential section in the Scheme, to the exclusion of the rights of all other owners and all other persons in the Scheme, to part of the common property roof above their section and located as depicted on the layout plan annexed hereto marked 'X' showing the location and size of each such area, these rights being conferred for the express and sole purposes of installing their own solar harvesting and associated equipment to serve their section.

29.2 Installation of Solar Harvesting and Associated Equipment

- (a) An owner may only install their solar harvesting and associated equipment on an exclusive use area established under this rule after having made written application to the trustees for approval of the specific installation with written and schematic detail of the size and appearance of the installation and the trustees have, after consideration of the application and any other information or document they may reasonably require for this purpose, given their written consent, which consent must not be unreasonably withheld.
- (b) A section owner entitled to exclusive use in terms of this rule is responsible for obtaining all required permissions and approvals from the relevant authorities before making the application referred to in 29.2(a) above and must comply with all relevant municipal by-laws, the Electrical Installation Regulations made under the Occupational Health and Safety Act 85 of 1993, and the body corporate's rules.

- (e) The body corporate must carry out and fund any maintenance, repairs and replacement of the common property rooftop space which would be necessary even if the relevant part of the common property were not subject to rooftop solar harvesting exclusive use rights, was not used as such, and had not been in any way altered for the relevant purpose. This includes general repair, maintenance and replacement of the roof itself.
- (f) Without derogating from the provisions of section 13(1)(a) the STSM Act, any person authorized in writing by the body corporate is permitted during reasonable hours and on notice (except in the case of emergency, when no notice is required) to access and enter a rooftop solar harvesting exclusive use area created under this rule for the purpose of

- (g) The body corporate may require the holder of the exclusive use rights to remove their solar harvesting and associated equipment temporarily or permanently if it is deemed necessary for the maintenance, repair, or replacement of the common property or if the equipment remains uninsured and or poses a risk to the safety or well-being of other residents.
- (h) If, despite written demand by the body corporate, the holder of the exclusive use rights refuses or fails to remove their solar harvesting and/or associated equipment as contemplated in 3(g) above and that failure prejudices the interests of the body corporate, its members or occupiers generally, the body corporate must remedy the exclusive use right holder's failure and recover the reasonable costs of doing so from them and the trustees may debit such costs to the section owner's account with the body corporate, and recover interest on it as if it were a contribution duly levied in terms of the STSM Act, provided that in the case of an emergency, no demand or notice need be given to the exclusive use right holder concerned.
- (i) The section owner will continue to be responsible and liable for common property/fixed electricity charges in accordance with their participation quota and reflected on the levy statement within the monthly Levy Amount.

29.4 Insurance

- (a) It is the responsibility of the section owner, through the Trustees, to ensure that the solar harvesting and associated equipment is added to the body corporate's insurance policy immediately upon installation and has adequate public liability cover. The section owner must ensure that the solar harvesting and associated equipment remains insured for the period that it is installed.
- (b) Payment of the additional premium payable on account of such equipment being added to the Body Corporate's Insurance Policy, is payable by the section owner concerned and will be added to the section owner's account with the Body Corporate.
- (c) The proof of insurance is to be sent to the trustees within 24 hours of the installation of the solar harvesting and associated equipment.
- (d) Any insurance excess amount that is related to damage to any part of a section owner's solar harvesting and/or associated equipment is payable by the section owner concerned and the section owner must furnish the body corporate with written proof from the insurer of payment of that amount within seven days of written request from the Body Corporate.
- (e) No risk or claim (including but not limited to a public liability claim, insurance claim shortfall, rejection, repudiation or excess etc) will pass to the body corporate, its employees, its members, its trustees or its agents for whatever reason. Such responsibility for payment will remain with the owner.

29.5 General

- (a) The installation and operation of the solar harvesting and associated equipment will be at the sole risk of the section owner and the section owner indemnifies the body corporate, its trustees, its employees, its members and its agents against any liability in this regard.

If the solar harvesting and associated equipment is to be sold with the section, all risks, responsibilities, and liabilities in respect thereof will be deemed to be passed to the successor in title on transfer of the section. It is the responsibility of the successor in title to familiarize themselves with this rule.

Annexure X: PV (Solar) panel distribution

The allocated number of PV (solar) panels is calculated by identifying the roof area available as well as the static load which is imposed in the roof structure.

The "standard" PV panel is being taken as a
Monocrystalline solar panel 550W

Height approx. 2300 mm

Width approx. 1150 mm

Weight of panel only: approx. 28 kg

Permissible panel configuration:

A maximum of 21.1 m² covered from the total roof area or 400 kg (19kg/m²) roof load for each panel window on the NE- facing and/or SW-facing roof area is permitted without having to submit a certificate from a structural engineer.

This is the equivalent of 8 "standard" solar panels as described above.

Should an owner wish to exceed the number of panels or the area in square meters within the windows shown on graph 2, then a certificate from a structural engineer, as specified in 29.2.(c), must be obtained and presented to the trustees before an application for fitment can be made. The used area for the panels may also not encroach any neighbours area.

Panels of different sizes may be used, but the area covered in m² may not exceed the sizes of the windows as shown in graph 2.

An installation must always be started from the center-line towards the outer edge, and the upper edge of the roof, with leaving at least 0,5m space from the center line to the face of the first PV panel in a row. The installation must furthermore leave a space of at least 0,5m from the lower and top edge of the roof.

The starting position for the first PV panel is also marked by a red dot.

All cabling must, where practical and possible, be in a ducting or conduit over the full visible length of the cable.

1 Aerial View – Belle Aire Place Complex :

Belle Aire Place is a complex, consisting of three rows and 22 separate buildings, facing North-East. PV (solar) panels are allowed to be fitted to common and exclusive property roof sections strictly in accordance with the specified windows in

diagram 2, and with full compliance to the complex rules outlined in section 19.

● Start here with first panel

Maximum 8 panels @ 550W or equivalent 21.1 m² or 400 kg (19kg/m²) roof load for each panel window on NE facing roof and optional also on SW facing roof

For each unit maximum 8 panels (additional maximum 8 panels on SW roof side)

Minimum 0.5m from roof center to left and right.

Minimum 0.5m from every roof edge.
